DETAILED ACTION

1. In response to the previous office action, Applicant has amended claims 1-5, 7, 8, 11, 12, 14, and 17-21; cancelled claims 22 and 23; and added claims 24 and 25.

Claims 1-21, 24, and 25 have been examined.

Information Disclosure Statement

2. The following Information Disclosure Statement in the instant application has been fully considered except as noted below:

IDS filed 18 September 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-21, 24, and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 16, and 21, it is unclear whether the phrase "a second authentication number" recited in lines 8, 7, and 7-8, respectively, teaches to the same second authentication number that is recited in lines 5, 4, and 5, respectively, or is meant to be

Art Unit: 2134

an equivalent number to be used for comparison. Since these differing definitions would give make a significant difference in the metes and bounds of the claimed invention, it is therefore indefinite. For purposes of the art search, it is being presumed that it is the same field.

All other claims depend from rejected claims 1, 16, and 21 and include all the limitations of those claims, thereby rendering those dependent claims indefinite.

Allowable Subject Matter

4. Claims 1-21, 24, and 25 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1, 16, and 21 as amended add additional limitations to the protocol that has previously been claimed. The closest art, the previously cited Muftic, does not disclose the returning of the first key encrypted by a second key where the second key had previously been transmitted in the opposite direction encrypted by the first key, where the receiver deliberately makes a determination as to the received keys being the same as those that had been transmitted. U.S. Patent No. 6,272,632 to Carman also teaches the returning of a previous key in a key updating algorithm, but this is not being done in a way that would suggest that the receiver would need to validate the received

key. Both Muftic and Carman disclose the initial distribution of a key through a separate channel.

All other claims are allowable based upon their dependence on allowable base claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
